Chromebooks and Google Apps for Education in JH English

RTTT Funding – 123 Chromebooks

New Library Renovations at Junior High School

STEM Teachers in Elementary Schools

Additional MakerSpaces

Computer Science at Ward Melville, Restoration of Technology class?

SMART SCHOOLS BOND ACT

Three Village Central School District's allocation is **\$3,395,850**

The purpose of the Smart Schools Bond Act is to improve learning and opportunity for public and nonpublic school students by funding capital projects to:

1. Install high-speed broadband or wireless internet connectivity for schools and communities;
2. Acquire learning technology equipment or facilities, including but not limited to interactive whiteboards, computer servers, and desktop, laptop, and tablet computers;
3. Construct, enhance, and modernize educational facilities to accommodate pre-kindergarten programs and to provide instructional space to replace classroom trailers; and/or
4. Install high-tech security features in school buildings and on school campuses, including but not limited to video surveillance, emergency notification systems, and physical access controls.

SMART SCHOOLS BOND ACT

What it can't be used for:

*Smart Schools Bond funds **may not** be used for professional development.*

However, the District must describe a plan to provide professional development to ensure administrators, teachers and staff can employ the technology purchased with funds from the Smart Schools Bond Act to enhance instruction successfully.

*Smart Schools Bond funds **may not** be used for technical support.* However, the district should provide sufficient on-going tech support to ensure that the technology (hardware and/or educational technology-related infrastructure) purchased with funds from the Smart Schools Bond Act will be distributed, prepared for use, maintained and supported appropriately.

*Smart Schools Bond funds **may not** be used for software or subscription services.*

SMART SCHOOLS BOND ACT

All funds will be distributed on a reimbursement basis.

We are currently seeking input from the school community on developing a 3-5 year plan that first includes instructional vision, goals and measurable objectives, as well as, a technological plan that supports those goals.

Items to consider:

Wireless Infrastructure

Network Infrastructure – Main core switches

Additional Security Cameras

Phone System

Electricity

Virtualization

Classroom Projectors/Displays
